

## Ian Snook Additional Prize 2017

The 2017 Ian Snook Additional Prize has been awarded to Kenichiro Aoki for his exploration of chaos in Hamiltonian  $\phi^4$  models [1].

The paper by Timo Hofmann and Jochen Merker, devoted to the exploration of generalized Hénon-Heiles models, has been selected for Honorable Mention in the Snook-Prize competition [2].

We congratulate the Winners.

- [1] K. Aoki, *Symmetry, Chaos, and Temperature in the One-Dimensional Lattice  $\phi^4$  Theory*, CMST **24**(2), 83–95 (2018).
- [2] T. Hofmann, J. Merker, *On Local Lyapunov Exponents of Chaotic Hamiltonian Systems*, CMST **24**(2), 97–111 (2018).
